

refresh, rehydrate WATER/GEL

CELLULAR HEALTH

It's been shown low oxygen and chronic inflammation are contributing factors to a startling number of health problems including asthma, arthritis, depleted immune function, and even some cancers. Benefits of oxygen include increased endurance and energy, enhanced absorption of vitamins, strengthened immunity, and more.

WHAT IS ARCHAEA ACTIVE™?

Founded on 15 years of research, the Archaea Active™ formula boasts all-natural ingredients in a combination that has been shown in independent scientific testing to increase the bioavailability of oxygen at the cellular level, as well as support a healthy inflammatory response. Both the WATER and GEL bear the FutreCeuticals® exclusive TargetTest™ Seal of confirmed bioactivity in humans.

HOW DOES IT WORK?

Rehydrate with Evolv WATER to experience the crisp, refreshing flavor of natural spring water containing the health-supporting properties of Archaea Active™. Evolv GEL is a dermatologist-tested topical delivery system that can refresh joints and muscles after a workout, or replenish tired, dry skin. Both are odorless, safe for children, and may be used as needed.

INGREDIENTS:

Milk Whey Protein, Extracts of Alfalfa Leaves and Stems (organic), Amylase, Bromelain, Cellulase, Lactase, Lipase, Papain, and Protease. *

Found in picomolar quantities. Safe for most lactose intolerance. See page 2 for complete nutrition information.

"I have for the past several months started having a lot of discomfort in my hand. I had not gone to the doctor yet, because I was afraid of the possible diagnosis. I started applying the gel and after a couple of days the gel soothed the discomfort I was having."
